

Imagine: A plain text document or stylus canvas.  
The only other feature is links. Need an image?  
Link to it and it will embed.

"The information becomes the affordance"

ENTER URL

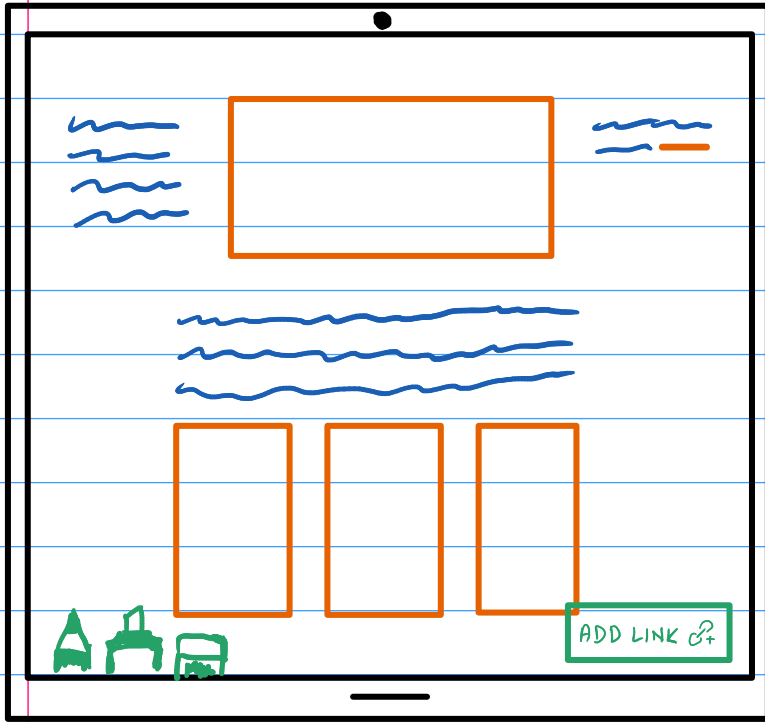

NAVIGATE,  
REDIRECT,  
LOGIN...

FIND THE PAGE  
YOU WANT TO PIN

This way, you  
don't link to  
pen.new, which  
would create a  
new pen every time  
you open the  
note

\* Should be able to  
pin a page then  
keep browsing

## LEGEND

links/embeds

writing

chrome

pages can specify how they would like to be embedded |  
as 3D objects  
as tools that enhance drawing (interact with the surrounding canvas)

A better iframe  
linking

LINKS  
ARE  
ALL  
YOU  
NEED
